## **REASONS FOR ALLOWANCE**

1. Claims 2-20 are allowed.
2. Claim 1 is cancelled.
3. The following is an examiner's statement of reasons for allowance:

The prior art of records fails to disclose or render an obviousness of a method for producing a plurality of clock signals having desired frequencies comprising step of: determining a least common multiple (LCM) of the desired frequencies and the master clock frequency; selecting divider values for one of the plurality of tiers of dividers subject to a requirement that input frequencies to that tier of dividers fall within a predetermined range and that they add a minimum number of few new factors to the LCM; and multiplying the LCM by any new factors needed to realize the dividers of the selected tier of dividers to yield a LumpLCM along with other features cited in independent claims 2, 10, and 15.

The closest found prior art is Weidner (U.S. 5,719,510). Weidner discloses a software configurable digital clock generator comprising a programmable divider for determining the clock frequency. However, Weidner fails to disclose in detail the above steps for producing a plurality of clock signals having desired frequencies.
